

SUBtraction Smash!

SUMMARY

Get your students working on 0-10 subtraction using Play-Doh modeling compound as a visual aid.

SET UP

Play-Doh compound

DIRECTIONS

Each student creates **10 PLAY-DOH BALLS TO START** and sets them up in their work area.

The teacher writes a number on the board from 0-10 to subtract from the original 10 Play-Doh balls.

Students then “**SMASH**” the balls of dough and write out the subtraction equation to match.

This activity can also be administered in reverse for addition equations as well!
